

THE MISSION

“The mission of the MDVIP Foundation is to raise public awareness of health, wellness and the value of prevention through charitable initiatives that will assist those most in need.”

THE OBJECTIVES

Responding to Emergencies

The MDVIP Foundation sponsors the Doctors in Response program that supports a coalition of physicians willing to give medical aid to Americans in need. The program provides immediate response to local disasters by offering medical care, supplies and resources to help rebuild communities when a crisis hits.

Revitalizing careers in primary care

The MDVIP Foundation provides a mentorship program for the next generation of primary care physicians to inspire them to remain in a profession that is critical to helping people be as healthy as possible. The program also encourages medical students of today to become the most passionate primary care doctors of tomorrow.

Help cure childhood obesity

Due to childhood obesity, our youth may have a shorter life expectancy than their parents for the first time in America. Obesity is preventable and starts by educating children on the importance of adopting healthy eating and exercise habits.

FEATURED INITIATIVE

Doctors in Response

This program supports a coalition of physicians willing to provide medical aid to Americans in need. The MDVIP Foundation will organize and offer financial assistance to a network of volunteer physicians ready to deploy when a crisis hits their local area. First responders are critical in saving lives as well as providing ongoing support to the most devastated areas of the country.
